

Quality Palliative Care in Long Term Care

A Community-University Research Alliance

Palliative Care for Front Line Workers

This LEAP course is being delivered as a pilot and includes enhanced content that is specifically relevant to long-term care. This 13 hour (11 module) Mainpro accredited course is designed to help with common and difficult end-stage resident and family care clinical issues in the long-term care setting. It is based on the Canadian Hospice Palliative Care Association model and is designed to engage health care providers (physicians, nurses, pharmacists, etc.) in a variety of learning opportunities. LEAP in LTC facilitates interprofessional collaboration and supports individual and team practice change.

Content includes:

- Module 1: Creating Context
- Module 2: Gastro-Intestinal (GI) Problems
- Module 3: Pain Management
- Module 4: Respiratory Problems
- Module 5: Communication
- Module 6: Depression, Anxiety and Suffering
- Module 7: Grief & Bereavement
- Module 8: Delirium
- Module 9: Palliative Sedation
- Module 10: Last Days & Hours
- Module 11: Working as a Team

Audience: Physicians, nurses, pharmacists and other licensed health care professionals working in long-term care.
